

“Mint Condition Engines”

From: Daniel B. Close
Director of Quality
Mint Turbines, LLC
Date: 11 May 2016
Subj: Additional Capabilities

To whom it may concern:

Mint Turbines, LLC (MTL) has capability to perform inspection, repair, overhaul, and test activities on a variety of aircraft engine models manufactured by Honeywell and Pratt & Whitney. All work performed on Federal Aviation Administration (FAA) Type Certificated engines is certified on an FAA form 8130-3, with or without a dual release, as dictated by the customer's requirements. All work performed on non-type certificated engines will be certified on a Certificate of Conformance (C of C).

A Complete list of the type certificated engine models that MTL is approved by the FAA to perform work on can be found on our Capabilities List located on our company website located here:

<http://www.mintturbines.com/quality.html>

In addition to the type certificated engine models that MTL is approved by the FAA to perform work on, MTL is also capable, qualified and willing to perform work on the following non-type certificated engine models:

1. Honeywell T53-L-13B and T53-L-703
2. Pratt & Whitney T400-CP-400, T400-CP-401 and T400-WV-402

The scope of work that MTL is capable of performing on the above listed engine models is identical to the scope of work MTL notes in its Capabilities List for type certificated engines.

If I or my staff can be of any further assistance regarding this matter, please contact the Mint Turbines Quality Department at (918) 968-9561.

Respectfully,

Daniel B. Close
