

## **FOR IMMEDIATE RELEASE**

### **MINT Turbines Announces Launch of Redesigned Website**

McLean, Virginia – January 22, 2020. M International is pleased to announce its flagship MRO facility MINT Turbines, LLC (Stroud, Oklahoma) today launched their redesigned website at “www.mintturbines.com.” This updated website features new visual and technical enhancements including streamlining the interface for ease of access to vital technical and contact information, and most of all - an enhanced website design. This new design makes information more accessible for users with an additional emphasis on cross-linking between other sites within the M International portfolio of companies.

David Norton, General Manager added “After many months of dedication and hard work, we’re incredibly excited and proud to announce the launch of our new website. We’ve taken our existing website and made numerous refinements to incorporate design enhancements, usability improvements, site speed improvements plus many more features to make your browsing experience more enjoyable and informative.”

Goals for the new website included faster access to company contacts; a Request-A-Quote feature and customer feedback tool; updated website directory; capability information for P&WC PT6A and PT6T and Honeywell T53 gas turbine engines; units for sale and company overviews.

#### **About MINT Turbines**

MINT Turbines, with over 40 years of unmatched service excellence, supports the Honeywell T53 and P&WC PT6A & PT6T gas turbine engine maintenance performing repairs, exchanges, overhauls, testing and field service support unequalled in the industry. This level of excellence was achieved by directing all efforts and resources toward efficient, high-quality production and outstanding customer service. We’re proud of our quality achievements as one of the few Service Centers in North America to achieve both ISO 9001:2015 and AS9110B certifications.

#### **About M International**

Since 1979, M International is a leading provider of aftermarket technical, MRO and supply chain management services for the aerospace and defense industry. Headquartered in McLean, Virginia (USA), they hold several OEM distribution and representation agreements. In addition to MINT Turbines, they are also the parent organization to Keystone Turbine

Services (Coatesville, Pennsylvania), Airborne Engines Ltd (Delta, British Colombia, Canada) and Southwest Fuels, LLC (Stroud, Oklahoma).
